

9240 In-line electrode support for pH-redox electrodes,

PVC material
with various process connections

Conductivity probes

conductivity measuring of liquids in containers
or open drains

Cell constant : 0,01...10

Option: integrated PT100 probe

Different materials

BamoPHOX 106 pH/mV-meter

for pH or redox measuring,
two line alphanumeric display for simultaneous
indication of measuring value and temperature,
Measuring range: 0-14 pH, + 1000 mV programmable,
automatically or manual temperature compensation
Analog output: 0/4 - 20 mA(2x),
Relay Output: 4 Alarm Contacts,
Option: Data-logger and RS 422 digital link and
integrated webserver

9300 Serie Immersion fittings,

for pH-ORP electrodes,
different types of immersion fittings for
optional Installation available,
Option: Self cleaning system

Industrial electrodes measuring of pH or ORP,

combined electrodes KCl or GEL,
universal dismountable S7-head,
connection: 13,5 Pg thread

BamoCHOR 9282 measuring system for free active chlorine,

for swimming pools,
for industrial water
Measuring range: 0 ... 5 ppm
